

Article 19.25: Map Display of IDX Listings

Last Updated: September 27, 2026

With a map display on an IDX website showing the locations of the listings matching a consumer's search with icons or pins, where a consumer may display a "popup" or "balloon" over the icon or pin by clicking or holding the mouse over it, required elements need not be displayed provided that (a) the consumer can click on the pop-up or balloon and view a page, including the listing information and the required elements; or (b) there is a display elsewhere on the page on which the map appears that includes the listing information and the required elements for all such listings on the map.
